PROFILE

Software Developer with a strong foundation in Python, React.js, DSA, and scalable application development. Experienced in building and integrating REST APIs, automating workflows, and developing efficient data processing solutions using Pandas and NumPy. Proficient in SQL and Git, with a focus on writing clean, optimized, and maintainable code.

EXPERIENCE

Software Developer

May 2024 – Present

Codnet Bichtech

- Worked on hands-on projects involving Python programming and applied AI/ML algorithms for data-driven solutions.
- Worked with libraries like Pandas and NumPy for data processing and analysis.
- Optimized code performance and integrated REST APIs for scalable applications

Data Science

Jan 2024 – Apr 2024

Vlippr

- Developed a Voice Cloning AI system using Python and deep learning to generate realistic human-like speech.
- Applied audio preprocessing techniques, including denoising and chunking, along with feature extraction, to improve voice similarity accuracy.
- Optimized the text-to-speech (TTS) pipeline, reducing latency and enhancing overall audio clarity and quality.

Python Developer Intern

Jan 2023 – Feb 2023

Humrobo Technology

- Developed scalable web scraping solutions using Python, BeautifulSoup to extract structured data from multiple websites.
- Applied advanced data extraction techniques and custom algorithms for efficient and accurate content retrieval.
- Implemented Breadth-First Search (BFS) to efficiently crawl and cover all relevant pages.

TECHNICAL SKILLS

Programming: Python | Java | PHP

Databases: SQL | MongoDB

Development Skills: WordPress | HTML | CSS | JavaScript | React.js

Key skills: Machine Learning | DBMS | OOPS | Next.js | REST APIs

Tools & Technologies: NumPy | Git | Pandas | PySpark

EDUCATION

Bachelor of Technology (CSE)

2020 – 2024

Noida Institute of Engineering & Technology(AKTU)

PROJECTS

Employee Management System

Developed a web-based Employee Management System using Java, Spring Boot, and MySQL. Implemented employee record management, attendance tracking, payroll processing, and role-based authentication. Built REST APIs, optimized database queries, resolved defects, and collaborated within Agile teams to deliver scalable solutions.

WhatsApp Chat Analyzer

Developed a WhatsApp Chat Analyzer using Natural Language Processing (NLP) techniques and machine learning algorithms like Naive Bayes for sentiment analysis, K-means clustering for topic grouping, and TF-IDF for keyword extraction, providing detailed insights and statistics from chat histories.

Text Summarization

Developed an automated text summarization system using NLP techniques such as tokenization and machine learning models. The solution effectively streamlined lengthy texts into clear and concise summaries, improving accessibility and readability of content.

CERTIFICATIONS

- Google IT Automation with Python
- Microsoft Python Development
- Certified Entry-Level Python Programmer
- Certified Associate in Python Programming

EXTRA CURRICULAR

Coordinator (Dodge Gaming Club), Volunteered and organized various coding and cultural events, Sports Enthusiast , Kabaddi Player
